The visit took place one day after the elements of the first series manufactured squadron-level fire module were delivered to the Polish military, within the framework of the Regina programme, with the Polish Rocket and Artillery Component of the military being the main beneficiary here. The equipment was transferred to the 5th "Lubuski" Artillery Regiment based in Sulechów and subordinated to the 12th "Szczecińska" Mechanized Division. The Regiment will become the second unit operating the Regina module, following the 11th "Mazurski" Artillery Regiment subordinated to the 16th "Pomorska" Mechanized Division operating the first "introductory" Regina module with 24 Krab spms.
