

KENYAN DELEGATES AT PIT-RADWAR

PIT-RADWAR S.A. HQ has been visited by the students of the National Defence College Kenya.

The participants attended a meeting during which the PIT-RADWAR S.A.'s product offer was presented. Then they got acquainted with the readymade products manufactured by the company.

PIT-RADWAR is a Polish manufacturer of radar systems and the company in question is a part of the PGZ Group. It offers radar systems such as TRS-15 or Soła. PIT-RADWAR is also the entity standing behind the Poprad air defence solution. The company has also developed the Bystra radar which is the first Polish AESA class radar.

The company is currently working on its PCL-PET passive location system and the P-18PL radar. Both sensors listed above are to become a part of the Wisła air defence solution during the phase II of the programme. The company is also developing a multifunctional fire control radar that is to be used within the scope of the Narew SHORAD programme. The system in question is known under the name "Sajna".
